KCD TAIPEI 2024

TRANSPARENCY REPORT

KCD Taipei comes back stronger than ever

This is the third time KCD has been held in Taiwan, and this year, we continue to co-locate with COSCUP. The number of participants and submissions has steadily increased each year, indicating that the Kubernetes community in Taiwan remains active and continues to grow.

This year's topics are more diverse, not limited to cloud technologies but also covering more experiences in setting up and using on-premises environments. This suggests that more and more industries in Taiwan are gradually adopting Kubernetes. Additionally, we have introduced lightning talks this year, which have attracted many enthusiastic participants to sign up and share.

SPEAKERS & SESSIONS

KCD Taipei 2024 collaborated with COSCUP to introduce the First Time Program. We offered new speakers feedback to revise their submissions before the CFP deadline, increasing their chances of acceptance. We received 32 submissions, with 16 accepted for the main agenda.

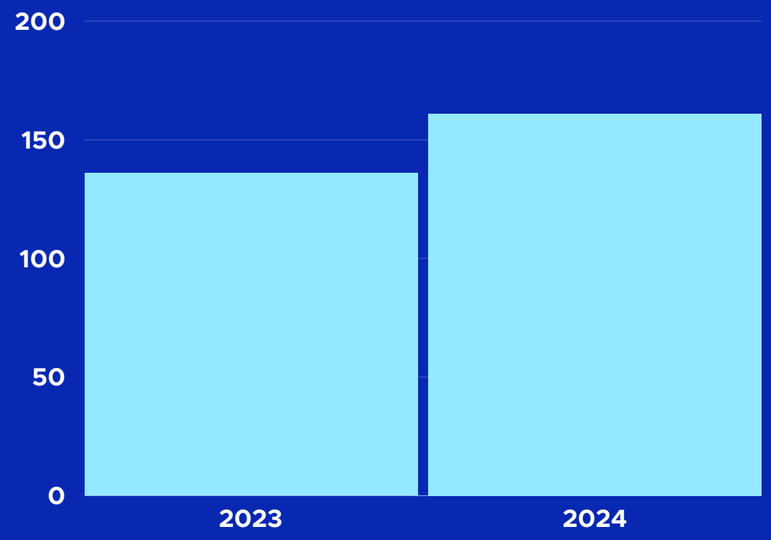
kube EVENTS

STATISTICS

According to Bevy's backend data, KCD Taipei's participation steadily increases yearly. This encourages us to continue offering valuable content and activities to meet the community's learning needs. KCD Taipei will become a key platform for networking, experience sharing, and technological innovation.

YEAR TO YEAR GROWTH



18%

GROWTH FROM LAST EVENT

Due to co-locating with COSCUP, we cannot actively collect relevant user data and rely only on CNCF Bevy’s post-event process to gather feedback. As a result, the amount of data we collect is not very comprehensive.

WHAT ATTENDEES SAID

“The topics for technical sharing can be based on practical experience to avoid encountering the same issues again. They should also provide insights into the thought processes and selection criteria used in technology choices and problem-solving.”

“Hope we can have KCD in Taiwan every year ❤️”

“Having more international speakers allows us to access the latest information from around the world.”
