1ST OCTOBER 2024

KCD CHATTOGRAM 2024

# TRANSPARENCY REPORT

## FOREWORD

# KCD Chattogram was online this time!

KCD Chattogram was organized online on 12th October. The event was streamed on YouTube and Facebook. We have more than 2000+ views in less than a week, and almost 100 folks attended the sessions live. The sessions covered about cloud natives, platform engineering, eBPF, Envoy, cloud native communities, etc.

The image shows a composite of two screenshots from a live event. The left screenshot features a host, Mitul Shahriyar, with a logo for 'CHATTOGRAM KCD GROWING CLOUD NATIVE TOGETHER'. The right screenshot shows a 'Quiz leaderboard' with a total score of 3802 p and a list of participants including Asem, Fatima, and Boaty McBoatface.

## Collecting telemetry data

- It's possible to collect all these data without using eBPF, but eBPF allows to achieve that in **MINUTES**
- There are always legacy and 3<sup>rd</sup> party services that you can't instrument. eBPF doesn't require code changes and redeployments.
- Usually, developers instrument only most critical services, so you can't be sure that you have no blind spots.
- Instrumentation is a continuous process, so you need to ensure that every new service integrates OpenTelemetry SDKs.
