

# gRPC Conf

## 2024

### OVERVIEW

In 2024, the CNCF hosted another successful gRPC Conf in Sunnyvale, CA, uniting a diverse community of developers, industry leaders, and contributors who drive the gRPC ecosystem. The conference offered a day with informative talks, live demos, practical case studies, and hands-on code labs. Esteemed experts shared their experiences with real-world gRPC implementations, provided invaluable developer insights, and explored a wide range of advanced topics. The event proved to be a must-attend for anyone leveraging gRPC in their applications or considering its potential for enterprise microservices architecture.
